PURETECH POTASSIUM

Fast acting foliar nutrient

PureTech Potassium is a non-chlorinated pure form of potassium for rapid uptake combined with an active formulation to maximise nitrogen efficiency and water utilisation enabling optimum yield and quality.

Foliar application

EC FERTILISER A3: 0-0-20

N Nitrogen	0%
P Available Phosphoric Acid (P_2O_5) ¹	0%
K Potassium Oxide (K_2O)	20%

Conditions of supply: Seller warrants that the product conforms to the chemical description and is reasonably fit for the purpose stated on this label when used in accordance with directions under normal conditions of use. Since weather, crop, soil and other conditions may vary, Verdesian Life Sciences and/or seller make no warranty of any kind, expressed or implied, concerning the use of this product. The user assumes all risks of use of handling, whether or not in accordance with directions or suggestions to the extent consistent with applicable law.

Recommended uses

ARABLE CROPS

CEREALS: Individual dose up to 2 l/ha.

Recommended programme: Up to 4 applications at GS12-16 (2-6 leaves unfolded), GS30-31 (onset stem extension), GS37-39 (flag leaf stage).

OILSEED RAPE: Individual dose up to 2 l/ha, latest timing of application GS59 (green bud, first yellow).

Recommended programme: Up to 4 applications at GS12 (2 leaf stage), GS13-16 (3-6 leaf stage), GS30-35 (stem extension) and GS59 (green bud, first yellow).

POTATOES: Individual dose up to 2 l/ha.

Recommended programme: 3 applications from GS21-23 (rosette stage), GS40 (tuber initiation) to GS47 (bulking).

SUGAR BEET: Individual dose up to 2 l/ha.

Recommended programme: 3 applications from GS12 (2 leaves unfolded) to GS39 (90% ground cover).

MAIZE: Individual dose up to 2 l/ha.

Recommended programme: 2 applications at GS12 (2 leaves unfolded) and GS13-16 (3-6 leaves unfolded).

PULSES: Individual dose up to 2 l/ha.

Recommended programme beans: Two applications at GS22 (2nd side shoot visible) and GS51 (1st flower bud visible).

Recommended programme peas: Two applications at GS32 (2nd node stage) and GS51 (1st flower bud visible).

OTHER CROPS

For recommended uses and guidance on all other crops including amenity, fruit and vegetables please contact Verdesian Life Sciences Europe on +44 (0)1730 720 100 or email technical@vlsci.com

Application

EQUIPMENT: PureTech Potassium can be applied through all standard crop sprayers using current best practice.

WATER VOLUME: PureTech Potassium should be applied in a solution less than or equal to 2% concentration (2 l in 100 l water). If applying with any other product at low water volumes use a solution less than or equal to 1% concentration (1 l in 100 l of water).

MIXING: Add the required amount of PureTech Potassium to the half filled sprayer tank with the agitation system running. Mix well, fill to the required level and continue to agitate at all times during spraying operations as well as when standing until the tank is emptied. Spray immediately after mixing.

COMPATIBILITY: PureTech Potassium is compatible with most agrochemical and plant nutrition products. When using in tank-mixture with other product(s) ensure the concentrates do not come into contact during mixing. Add PureTech Potassium as the final product.

CLEANING: The sprayer should be thoroughly cleaned in accordance with best practice.

STORAGE: Store in a cool, dry place. Keep container tightly closed and out of direct sunlight during extended storage. **Store above 0°C.**

User safety

**PURETECH
POTASSIUM**

This product has no hazard classification under CLP.

Please follow routine practice with respect to any mixture products.
