VERDESIAN
THE NUTRIENT USE EFFICIENCY PEOPLE®

PRESIDE® ULTRA

A **VERDESIAN** NUE SOLUTION®

Preside® Ultra super concentrated inoculant helps provide soybeans with increased levels of nitrogen in the plant.

Preside® Ultra uses **Take Off®** technology to accelerate nutrient acquisition and utilization in the plant. This leads to earlier and more uniform emergence, producing a more powerful stand capable of producing a higher yield potential.

CROP
Soybean

TIMING
Up to 120 days on seed

RATE
0.75 fl oz per 140,000 seeds

PACKAGE
1 x 1000 unit case - FlexConnect® enabled

1 x 200 unit case - FlexConnect enabled

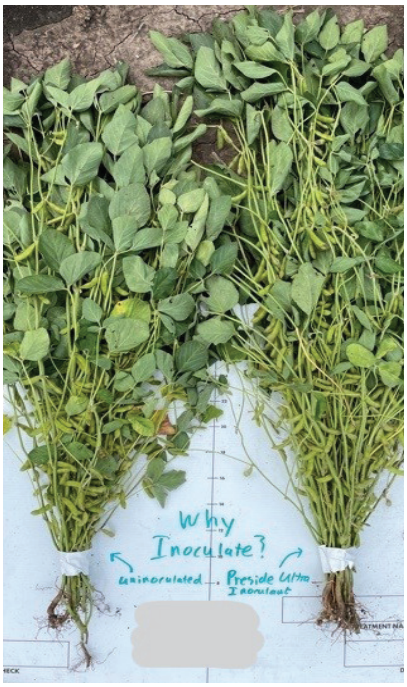

1 x 500 unit case - traditional pull tab

4 x 50 unit case - traditional pull tab

PRODUCT BENEFITS

- Average 15% improved stand for the critical first four weeks
- Healthier, stronger plants for better yield potential up to 85% of the time over other inoculants or no inoculant
- Soybeans require 5 pounds of nitrogen per bushel produced and Preside Ultra provides up to 2X the amount of rhizobia per seed (compared to the competition) to produce more nitrogen
- More rhizobia combined with Take Off can improve effective nodule mass by up to 65%, creating greater nitrogen-fixing capacity which ultimately can result in higher yield potential
